Technology Careers: Independent Learning Guide

The role models in the video "Technology Careers" share reasons you should consider a career in technology.

Watch the video "[Technology Careers](#)" at least once. Then read each statement below. Think carefully about each question before you answer it.

- 1. The first technology role model said that a career in technology is "more interesting than you think." That tells us that many people think a career in technology is not interesting.**

How can you know for sure if a career in technology is actually interesting or not?

- 2. The same technology role model said that a career in technology is challenging and will "open doors for you."**

What does it mean when a career "opens doors for you"?

- 3. In the video, we learned that when a woman prepares for a career in technology she has a chance to be a pioneer.**

How does having a career in technology make you a pioneer?

- 4. The video reminds us that technology is all around us, not just in our phones and computers, but everywhere in our daily lives.**

Where have you noticed new technologies making a difference in your life?

- 5. Sometimes a career in technology can be combined with other interests.**

What other interests do you have that might be successfully combined with a career in technology?

6. Technology experts usually earn a lot of money in their careers.

How does earning a good salary help you enjoy more freedom? How important do you think salary considerations should be when selecting a career? Explain your answer.

7. Technology experts create applications we use on our computers, tablets, and phones. These applications help us lead better lives.

What application do you wish you could create that would help people live better lives?
